

MICROSOFT D365 Business Central | NAV Solutions & Services

End-to-End Dynamics Solutions for Implementation, Support, Maintenance, and Enhancements.

- Are you aiming to achieve specific business objectives through this implementation, upgrade, enhancement, or support engagement?
- Is there an established approach to manage change requests, enhancements, and ongoing maintenance activities? Are the current ERP systems, integrations, and third-party applications fully mapped and documented?
- Are the data volumes, historical data, and compliance requirements accounted for in the project planning?
- Are operational timelines, critical business cycles, or blackout periods considered in the implementation schedule?
- Are the expected levels of ongoing support, SLAs, and continuous improvement clearly defined for the Dynamics partner?

Nowara

Nowara Infotech is a dynamic technology solutions partner helping businesses unlock their full potential through intelligent ERP and digital transformation services. As a certified Microsoft Dynamics partner, we specialize in delivering powerful, scalable solutions built on Microsoft Dynamics 365 Business Central, LS Central, and modern cloud technologies. Our expertise enables organizations to streamline operations, gain real-time insights, and enhance decision-making across key business functions.

With a strong presence across India, the UAE, and global markets, we serve a diverse range of industries including retail, manufacturing, pharmacy, and distribution. Driven by innovation, industry knowledge, and a customer-first mindset, our experienced team works closely with clients to design, implement, and support solutions that are tailored to their unique business needs. At Nowara Infotech, we don't just implement technology—we create long-term value, foster growth, and build partnerships that help businesses stay competitive in a rapidly evolving digital world.

Functional & Technical Expertise

Nowara combines **deep functional expertise** with **strong technical knowledge** to deliver solutions that truly align with business requirements:

- **Functional Expertise:** Business process mapping, financial management, supply chain, project management, CRM processes, and industry-specific workflows across manufacturing, retail, services, and e-commerce.
- **Technical Expertise:** System implementation, Extensions 2.0 development, integrations, customizations, data migration, cloud deployment, and application development using Microsoft technologies.

Upgrade & Transformation Services

Nowara provides a **structured approach to ERP and CRM upgrades**, ensuring smooth transitions and maximum business value. Key services include:

- System assessment and gap analysis
- Process optimization and workflow alignment
- Data migration and cleansing
- Customization alignment for Extensions 2.0
- End-user training and post-upgrade support

Our Support Advantage

We offer a flexible engagement model, combining onsite and offshore teams to optimize cost, efficiency, and response times. Clients benefit from:

- Dedicated domain experts and proactive monitoring
- 24x7 support and helpdesk access across time zones
- Continuous value delivery to maintain system stability and performance

Industry Served

Nowara's Flexible 'Best-Shore' Delivery Model

Nowara adopts a **dynamic engagement approach** that blends onsite and offshore resources to deliver high-quality, timely, and cost-effective solutions. Our '**Best-Shore' model** ensures that clients receive the right expertise, in the right place, at the right time.

- **Onsite Services**

Onsite efforts focus on activities that benefit from **direct collaboration with client teams**, including:

- i. Business process analysis and requirement workshops
- ii. Hands-on user training and guidance
- iii. User Acceptance Testing (UAT) support
- iv. Critical phase handholding and implementation assistance

- **Offshore Services**

Tasks that can be efficiently executed remotely are handled by our **skilled offshore teams**, using modern collaboration tools such as video calls, chat, email, and dedicated support portals. Offshore activities include:

- i. Solution design, development, and customization
- ii. Prototyping and functional enhancements
- iii. Helpdesk support and issue tracking
- iv. System upgrades, documentation, and reporting

This blended approach allows Nowara to **maximize efficiency, reduce costs, and accelerate project timelines**, while maintaining continuous communication and transparency through our **support portal and task tracking system**.

Product Features Highlights

- **Dynamics 365 Business Central – Unlock Business Potential**
 - ✓ **Connect Operations:** Finance, sales, inventory, and projects on a single platform
